## Eligibility Criteria

### Military History

Veterans must have served 90 days of active duty with 1 day during a period of war. An honorable, general, or medical discharge is required.

### Medical

The Veteran or spouse has cognitive or physical impairments that require the assistance of another individual on a regular basis.

### Income

If care expenses exceed income, the maximum benefit will be awarded; most individuals receiving senior care meet this qualification.

### Net Worth

The VA considers assets in making its determination; with proper planning, most can become eligible.
